

PREPARING FOR THE UNEXPECTED

While carrying out a risk assessments and developing procedures will assist in preventing accidents or incidents occurring, you will also need to decide how you respond if and when something goes wrong. Show organisers and all persons assisting in the event must play their part in dealing with any unexpected situations. It is therefore important that prior to the event all persons are informed of their duties, the procedures and reporting instructions in order to ensure overall safety is maintained throughout the event.

SJI ACCIDENT / INCIDENT REPORTING POLICY

'Working Together to Ensure Safety'

It is the policy of the *Show Jumping Ireland (SJI)* that all accidents and Incidents are reported in accordance with the practice as outlined herein. This policy statement is a reaffirmation of our continued commitment in conjunction with the mission and values of the Show Jumping Ireland. All SJI affiliated shows, members and any other persons involved have an obligation to comply with the SJI safety policies, rules and procedures so as to ensure the safety of all persons.

Any person involved in an incident or accident regardless of injury must report it immediately to the Safety Officer or first aider / medics. Where the injured person is unable to report immediately, a person on their behalf must report it to the Safety Officer. All accidents / incidents must be recorded on the SJI Accident Form as per SJI reporting procedure. Show organisers should ensure that all persons involved with the show are informed of the Accident / Incident guidelines and procedures.

The SJI updated Accident Policy supports a reporting culture, which requires all stakeholders in show jumping to report any occurrences, incidents and accidents to Show Organisers and the SJI. The data gathered from reported events is statically analysed for the purpose of identifying trends that may affect show jumping safety. The statistics are reviewed and monitored with the aim of improving the safety of the sport where possible.

The SJI requires both proactive and reactive monitoring records to be maintained so as to track and trend risk areas of all reported items and circumstances in ensuring the implementation of risk management strategies.
